An interest game so far with a neat concept with possessing other bodies and trie to change their lives for the better or worse. Would of been nice if there were more girls to chose from and maybe get more endings, maybe even one with you staying in the life of another person. I think this concept would work for another Visual Novel.

So far I got the best ending with the blond girl Akira (or whatever her name is) and two bad/normal endings. Still trying to figure out how the end up with the blue haired girl Kasumi (again whatever he name is). If another knows how to get the ending without spoiling the plot, I would be gratful.

I recommend anyone to try out this game, regardless it being short and hope this might be used in another Visual Novel with more character romance options and a longer story/plot.. It's incredible game! It looks like Child of light(another one incredible game) and it has a beatiful story with great characters.

10/10. I've gotta give a thumbs up to the creator for taking time to make a great game.Paper Mario TTYD was my first game, and this mixes memes with my childhood.How could I turn this game down?When I get a few bucks I'm buying the full version.. This is one \u2665\u266

Colors, skills, species, types, levels and duplicates are all the parameters you need to take into account when customizing your roster, and it works surprisingly well considering i've spent a good portion of my 5 hours so far reflecting on it.

For example, you can level cards sure, but it doesn't mean you always should. Some cards are best fielded at level 1 and then upgraded in battle through fusion with duplicates of higher levels. Some other cards should be straight used at max level. Some cards are best used in a pinch for their one time bonus while others will be the meat of your frontline. And speaking of meat it doesn't hurt that it's full of eye candy.

Well optimized and runs without an itch, the story is simple but pleasantly not cringe worthy so far contrary to what often comes with the anime genre.

Artworks are a bit inconsistent but on the good quality side in general. The soundtrack is surprisingly nice too, nothing to write home about but good.

Cash shop is 100% optional, i.e for whales with extra money they don't care about spending if ever they wish to unlock rare cards immediately as opposed to get them while playing naturally. And then again at 1 buck a booster, that's as tiny as whales can be. Don't be that player who whines just because.

A good suprise overall, had my eyes on this for a while waiting for PC port, and at this price it's absolutely worth it. Just don't do micro transactions if you don't want to, you don't need it, i for one won't use it, although i like my share of grind in games like these, so if you hate grinding maybe think about it twice.. good experience. Perfect blend of arcade action and challenge delivered in short, intense blasts of fun. Really enjoying the minimalist presentation and how quickly you can get back into the fray.

Great bundle if you like casual point and click games. All 6 games are a decent length, but if you're someone who plays a lot of these then it won't take you too long - they're pretty simple puzzles. Decent price. Thumbs up!!. Not bad for \$0.20. This is everything that I have ever wanted in a game. Clever use of Shakespeare's work, amazing artwork and the suave-ist Ophelia that ever graced this planet. It's smart, it's snappy and it's sassy as all hell. Could use some better explanation of the key bindings (took me a while to reaslise esc would skip etc etc) but around about the point I was basejumping in a glide suit I decided I didn't care about the details, I just want to live in the world this team created.

I would recommend this if you are a fan of "Hark A Vagrant" or "Dinosaur Comics". It is that style of humour.. This is a great game. Don't hesitate spending \$7 on it. You will have FUN.. My god! Brings back good old memories. :O

On release. 10/10. This new feature of choosing into what u can upgrade your units is incredible! It makes you think even more about your tactics on the battlefield. These new types of synergy between units is also so well-produced that I'm having no idea why this game is not being played more than default version of Heroes V.

The only bad feature this game has, as it had also in a HoF chapter, - campaign is so boring and not interesting comparing to the first chapter of Heroes V - they should've thought about it more.

In terms of gameplay and new HoMM features this game is totally worth its cost, enjoy!. This game is epic cant believe i never heard of it before its so much fun i have no complaints what so ever :). This game is very repetitive, don't get me wrong I think it is an awesome game especially when I'm at college and have to play in offline mode which limits the amount of games I can play, but it is very repetitive. By repetitive I mean that there are 3 maps and I thought there was only 1 map as it wasn't easy to find how to change between maps. The 3 maps are very straight forward literally! Because the maps are very long and that's it, there isn't many roads on each of them, they have a few turns hear and there but it is 1-2 main roads and a couple more smaller roads. Another negative about the game is how unrealistic the game is yet again don't get me wrong, the graphics aren't bad but the AI are awful, I will be driving and a truck will flip up into the air or a car will just suddenly roll over or disappear. Also on the Australia map there are fire engines that drive around, just fire engines no other emergency service and the problem is they do nothing, they aren't going anywhere which is something I can deal with but they are a normal vehicle, there state is as a normal vehicle; same speed, doesn't overtake. Last negative point I would like to mention is the trailer, the trailer in itself isn't registered as an obstructive object as cars and trucks will just drive into it, this can be easily tested by parking your trailer in the middle of the road and detaching it (Press 'T') so you can see the crash. I can be driving slow and a car will ram up behind me which loses me points and I like to maintain a 100% delivery rate (I'm sad like that).

Okay now for the positives, the graphics to me are spot on, and the extras like indicators, window wipers and hazard lights are all there which is something I love. The road trains are the best things ever to drive because to me the longer the vehicle, the better. The physics feel good as well.

Overall I don't recommend this game, Euro Truck Simulator 2 is the way to go if you are after a trucking game, the maps are bigger and everything is much more realistic.

. This is the type of game someone creates to pay off their mortgage and then never touches it again, not that making a game to pay off your mortage is bad, it is just so like every other game of that category. This is one of the first games I bought on steam and I managed to pull my way through 9.9 hours of sitting in a corner pressing M1 as I eat cookies.

The music is sorta nice. Half the time its some some person saying a line over and o

After 9.9 hours I made it to mission 16 out of around 24. I dare you to play more than 1 hour and a half. I have a test soon and just like this review, this game is a waste of my time.. This is a true adventure game with a few HOS 's in it. The graphics are

truly fabulous and I love how you can move in a panoramic view in a lot of the scenes. The story line was compelling and based on a connection between the events in London (Jack the Ripper) in the 1800's and a present copycat killer in present day Chicago. There are not a lot of things to do in any one scene but in adventure game style there are many places to go and investigate.
