Oh boy this game. Where the first game had a certain charm to it (think The Room but with more ragdolls) this game is just a cash grab. I know right? Calling an asset dump of a game a cash grab seems a bit silly? Well let me tell you a lil somethin. This game lies to you. Yet again. I forgave the first game for it. I could forgive the ragdolls on soldiers that fly around like trash bags in Hurricane Katrina when they die. I could forgive the same melee animations playing for every enemy type. I could forgive the royalty free music that peaks in audio causing my ears to bleed. I could forgive the awful menus. I could forgive the cars having no friction and and the smallest amount of force being applied to make them go flying through the air. I can forgive the fact this game still has the tutorials from the Unreal Engine still in the levels when you play them. But I cannot forgive the developer for not having a sniper rifle in a game where you're a Gangsta Sniper.. Cool! Very cool action, with elements of indie games and adventure games. Quite clear interface with high-quality graphics, with such not very high requirements, which facilitates the ability to play many players! You play as a person from 3 persons. A good continuation of the first part. In my opinion there are not enough achievements, translation into many languages u200bu200band multiplayer, but I am sure that it will appear soon.
